## OBJECTIVE

---

A passionate MERN-Stack Developer seeking an internship opportunity to leverage my expertise in full-stack development, contribute to innovative projects, and grow professionally in a collaborative environment. Eager to apply my technical skills in React, Node.js, and MongoDB while aligning with your organization's mission to deliver user-centric solutions.

## PROJECTS

---

### Scorpify - Your Gateway to Sound

HTML, CSS, JavaScript

- Developed a fully responsive music streaming web app inspired by Spotify.
- Ensures seamless experience across devices (desktop, tablet, smartphone).

### Quiz Application

HTML, CSS, JavaScript

- Engaging quiz app with thought-provoking questions and instant feedback.
- Unique feature: A 1-second delayed alert appears after selecting the correct answer.
- Displays a summary of correct answers after the quiz ends.

### Snake Game

JavaScript, HTML, CSS

- Modern take on the classic snake game with smooth animations and sound effects.
- Introduced dynamic food movement (left to right) to increase difficulty.
- Tracks scores and unlocks levels for an engaging experience.

### To-Do List

React.js, Tailwind CSS

- Built a responsive To-Do app with task management features (add, edit, delete).
- Utilizes localStorage for persistent data storage.
- Toggle visibility for completed tasks with an intuitive UI.

### PassOP - Your Own Password Manager

React.js, Tailwind CSS

- Feature-rich password manager with secure save, edit, delete, and copy functions.
- Integrated React-Toastify for notifications and clipboard support.
- Includes smooth animations and a GitHub profile button.

### Dummy Data Generator

Express.js, MongoDB, Mongoose

- Developed a backend-driven data generator that inserts data into a MongoDB database.
- Seamlessly stores data upon button click using Express.js and Mongoose.
